Development | Machinery | Services

About Us

Professional

Inherent with business ethics and skill sets for design and deployment of solution.

Creative

No Box to Box replacement - innovation is the zest of Ingenious with out of the box ideology.

Talented

Team of educated and highly experienced people in the real field of operations.

SOLUTIONS BY US

Packaging

**Sustainable-
Primary/Secondary/Territory
Solutions** with or without Automation

Loads

**Tailored & Optimized -
Logistics Solution** for FTL & LTL/Part
Domestic & Exports

PACKAGING

- ▶ **Packaging Design and Solution** (Domestic / Export Standardization)
- ▶ **Packaging Process Improvement** (Packaging / Pre-Packaging)
- ▶ **Sustainability Performance** (Waste reduction - Carbon Footprint)
- ▶ **Cost Reduction** (Vendor Consolidation, Automation)

What Ingenious 'Can Do'

By serving as the single point of contact, we help your company to manage the complexities of packaging. To develop a customised solution, it is crucial to understand how your packaging is performing. We begin with a conversation that includes the following questions:

- What is your product damage rate due to packaging?
- What are your handling and repackaging costs?
- How are packaging inefficiencies negatively affecting your profitability?
- What are your sustainability goals?

Though each program is unique and customised, we use the process of Discover, Design and Deliver to ensure your packaging solution is aligned with your business goals.

How Ingenious 'Can Do'

Discover

We take a close look at your supply chain to identify savings opportunities, uncover inefficiencies and determine where the biggest concerns are, so we can make the best recommendations based on the current state of your packaging operations.

Design

There is no such thing as a one-size-fits-all packaging solution. We design and engineer packaging solutions made to fit your products and your supply chain. It's only the "right fit" if it's customised for your specific needs.

Deliver

As the single point of contact for your packaging production, we ensure your solutions are delivered to your factory on time and on specification. These hidden savings drive results where it matters most your bottom line.

4 PILLAR OF OUR SUCCESS

SALES, MARKETING AND PROJECT MANAGERS

Our sales and project managers are the main points of contact and take full responsibility for each program. These professionals are insight knowledgeable in all aspects related to packaging, including materials, design and distribution.

ENGINEERING, DESIGN AND TESTING

Our design and engineering teams create custom packaging solutions to provide savings to the customer. They extend graphics across products, optimise structural design and conduct rigorous performance testing, so your packaging can be implemented consistently.

SOURCING

Effective sourcing is a critical aspect of any supply chain. Our sourcing team ensures the capabilities and capacity of each vetted supplier. They identify the best value and materials to anticipate each customer's needs.

QUALITY AND COMPLIANCE

Our regional quality and compliance teams assess our production teams assess our production network, making sure all packaging meets or exceeds the requirements of our customers. They monitor and audit packaging facilities to ensure compliance.
